

Unit Description	Unit Objectives
<p>In Unit 1, students will develop mathematical understandings and skills to solve problems relating to the topics:</p> <ul style="list-style-type: none"> <li>• Topic 1: Arithmetic and geometric sequences and series 1</li> <li>• Topic 2: Functions and graphs</li> <li>• Topic 3: Counting and probability</li> <li>• Topic 4: Exponential functions 1</li> <li>• Topic 5: Arithmetic and geometric sequences and series 2.</li> </ul> <p>Arithmetic and geometric sequences are introduced and their applications are studied. Simple relationships between variable quantities are reviewed and these are used to introduce the key concepts of a function and its graph. Quadratic functions and index rules are revised. The study of inferential statistics begins in this unit with a review of the fundamentals of probability and the introduction of the concepts of conditional probability and independence. The algebraic expansion of powers of a binomial are found using the binomial theorem.</p>	<p>Students will:</p> <ol style="list-style-type: none"> <li>1. select, recall and use facts, rules, definitions and procedures drawn from all Unit 1 topics</li> <li>2. comprehend mathematical concepts and techniques drawn all Unit 1 topics</li> <li>3. communicate using mathematical, statistical and everyday language and conventions</li> <li>4. evaluate the reasonableness of solutions</li> <li>5. justify procedures and decisions by explaining mathematical reasoning</li> <li>6. solve problems by applying mathematical concepts and techniques drawn from all Unit 1 topics.</li> </ol>

Assessment Plan:				
Task	%	Objectives to be assessed	Conditions	Date
IA1 – Internal Assessment 1 PSMT – Unit 1 – Topic 2	20	As above – all objectives included on assessment item	4 weeks – including 3 hours of class time	Term 1 Week 9
Task	%	Objectives to be assessed	Conditions	Date
IA2 – Internal Assessment 2 Examination – <i>representatively sample all Unit 1 topics not assessed by the PSMT</i>	15	As above – all objectives included on assessment item	Closed Book QCAA formula sheet provided Technology Free Technology Active  120 minutes + 5 minutes perusal	Term 2 Week 5

**Monitoring and Reviewing:**

<b>Strategies for Monitoring Student Progress</b> <i>Strategies as a team to ensure that students are recycling through content</i>	<b>Date</b>	<b>Planned Reviews at Key Intervals</b>	<b>Date</b>
Student Summary Rule book – separate book following through all units Proficiency scales Know and be able to do tables Regular vocabulary review, HW – weekly review, Formative items Common mistakes recognition Use of online support – Education Perfect, Khan Academy, Text-based online support Graphic organisers – e.g. mind maps, Frayer model, KWL (what I know, what I want to know, what I have learnt)		10 minute review (weekly quiz) during one lesson a week Mathspace quizzes - weekly  Formative items	Each week  Week 5 Week 10

Underpinning Factors:			
Guaranteed Vocabulary:		Literacy Skills	21 <sup>st</sup> Century Skill/s
Technical – <ul style="list-style-type: none"> <li>• arithmetic sequence /series / progression</li> <li>• common difference</li> <li>• transformation (translation, reflection, dilation, stretching, squeezing)</li> <li>• piece-wise function, domain</li> <li>• function, relation</li> <li>• parameter</li> <li>• factor of a polynomial function</li> <li>• axis of symmetry</li> <li>• quadratic, cubic, fourth-degree polynomial aka parabola, cubic, quartic</li> <li>• discriminant</li> <li>• continuous</li> <li>• local and global minimum / maximum</li> <li>• turning point</li> <li>• zero of a polynomial function</li> <li>• inverse proportion</li> <li>• direct proportion</li> <li>• asymptote</li> <li>• factorised form</li> <li>• vertex</li> </ul>	Procedural – <ul style="list-style-type: none"> <li>• transform</li> <li>• graph</li> <li>• sketch</li> <li>• factorise, expand</li> <li>• complete the square</li> <li>• solve</li> </ul>	<b>Written</b> using technical / procedural vocabulary using conventions (symbols, abbreviations) e.g. <ul style="list-style-type: none"> <li>○ <math>AP, S_n, a, d, n, t_i, t_2...t_n</math></li> <li>○ <math>f(x), f(x+2), f(x)=4 \quad 0 \leq x \leq 2</math></li> <li>○ <math>A, A', P(\bar{A}), A \cap B, A \cup B, \emptyset, P(A B), P(A), Pr(A) \geq 0, \text{ for each event } A, 0 \leq P(A) \leq 1, \binom{n}{r}</math></li> <li>○ <math>\sqrt[b]{x^a} = x^{\frac{a}{b}}, a^b \times a^c = a^{b+c}, \frac{a^b}{a^c} = a^{b-c}, (a^b)^c = a^{b \times c}</math></li> <li>○ <math>t_n = t_1 r^{n-1}, S_n = t_1 \frac{r^n - 1}{r - 1}, S_\infty = \frac{t_1}{1 - r}</math></li> </ul> <b>Oral</b> articulating patterns and generalisations — putting thoughts into words <b>Visual</b> using graphs, tables, diagrams, symbols	<b>Critical thinking analytical thinking</b> <ul style="list-style-type: none"> <li>- problem-solving</li> <li>- decision-making</li> <li>- reflecting and evaluating</li> </ul> <b>Communication</b> <ul style="list-style-type: none"> <li>- using language, symbols and texts</li> </ul> <b>Creative thinking</b> <ul style="list-style-type: none"> <li>- seeing new links</li> </ul> <b>Collaboration and teamwork</b> <ul style="list-style-type: none"> <li>- relating to others</li> <li>- participating and contributing</li> </ul>
		<b>Numeracy Skills</b> <ul style="list-style-type: none"> <li>▪ calculating with whole numbers, percentages and surd/index form</li> <li>▪ developing an understanding of the meaning of decimals and percentages and how they can be applied in real-life situations</li> <li>▪ recognising and using patterns and relationships</li> <li>▪ selecting and using digital tools</li> <li>▪ interpreting data</li> <li>▪ managing information, e.g. graphs, tables</li> <li>▪ making decisions and judgments with critical orientation</li> <li>▪ interpreting solutions in the context of a problem</li> <li>▪ using reasoning to check solutions</li> </ul>	<b>Cognitive Verbs</b> <b>Retrieval and comprehension</b> – use, define, recall, construct (graphs), identify, understand, recognise, explain, sketch, calculate  <b>Analysis</b> - consider, determine, apply, analyse, deduce, identify  <b>Knowledge utilisation</b> – investigate, devise, discuss, develop, solve, design, create (a mathematical model), explore, generate

**TEACHING AND LEARNING PLAN:**

Hours/ Weeks	Unit Objectives	Subject Matter	Learning Experiences [reflecting DQ 3, 4, 5 and 6]	Possible Resources
Unit 1 Weeks 1-2  Term 1 Week 1-2 3 hours	1, 2, 3, 4, 5, 6	<b>Arithmetic and geometric sequences and series 1</b> <b>Arithmetic sequences</b> <ul style="list-style-type: none"> <li>recognise and use the recursive definition of an arithmetic sequence: <math>t_{n+1}=t_n+d</math></li> <li>use the formula <math>t_n=t_1+(n-1)d</math> for the general term of an arithmetic sequence and recognise its linear nature</li> <li>use arithmetic sequences in contexts involving discrete linear growth or decay, such as simple interest</li> <li>establish and use the formula for the sum of the first <math>n</math> terms of an arithmetic sequence: <math>S_n=n/2(2t_1+(n-1)d)=n/2(t_1+t_n)</math></li> </ul>	Refer to the QCAA TLAP	Textbooks Maths Quest - Mathematical Methods Units 1&2 (Jacaranda)  Digital version also available  <i>Classic Mistake.co.uk</i> , 'Classic mistakes', <a href="http://www.calculatorsoftware.co.uk/classicmistake/about.htm">www.calculatorsoftware.co.uk/classicmistake/about.htm</a> .
Unit 1 Weeks 3-8  Term 1 Weeks 3 – 8 19 hours		<b>Functions and graphs</b> <b>Functions</b> <ul style="list-style-type: none"> <li>understand the concept of a relation as a mapping between sets, a graph and as a rule or a formula that defines one variable quantity in terms of another</li> <li>recognise the distinction between functions and relations and use the vertical line test to determine whether a relation is a function</li> <li>use function notation, domain and range, and independent and dependent variables</li> <li>examine transformations of the graphs of <math>f(x)</math>, including dilations and reflections, and the graphs of <math>y=a(x)</math> and <math>y=f(b)</math>, translations, and the graphs of <math>y=f(x+c)</math> and <math>y=f(x)+d</math>; <math>a,b,c,d \in R</math></li> <li>recognise and use piece-wise functions as a combination of multiple sub-functions with restricted domains</li> <li>identify contexts suitable for modelling piece-wise functions and use them to solve practical problems (taxation, taxis, the changing velocity of a parachutist).</li> </ul> <b>Review of quadratic relationships</b> <ul style="list-style-type: none"> <li>examine examples of quadratically related variables</li> <li>recognise and determine features of the graphs of <math>y=x^2</math>, <math>y=ax^2+bx+c</math>, <math>y=a(x-b)^2+c</math>, and <math>y=a(x-b)(x-c)</math>, including their parabolic nature, turning points, axes of symmetry and intercepts</li> <li>solve quadratic equations algebraically using factorisation, the quadratic formula (both exact and approximate solutions), and completing the square and using technology</li> <li>identify contexts suitable for modelling with quadratic functions and use models to solve problems with and without technology; verify and evaluate the usefulness of the model using qualitative statements and quantitative analysis</li> <li>understand the role of the discriminant to determine the number of solutions to a quadratic equation</li> <li>determine turning points and zeros of quadratic functions with and without technology.</li> </ul>	Formative assessment item Week 5  PSMT – 4 weeks Out W6 - Tuesday Due W9 - Tuesday	Refer to the QCAA TLAP

		<p><b>Powers and polynomials</b></p> <ul style="list-style-type: none"> <li>• identify the coefficients and the degree of a polynomial</li> <li>• expand quadratic and cubic polynomials from factors</li> <li>• recognise and determine features of the graphs of <math>y=x^3</math>, <math>y=a(x-b)^3+c</math> and <math>y=k(x-a)(x-b)(x-c)</math>, including shape, intercepts and behaviour as <math>x \rightarrow \infty</math> and <math>x \rightarrow -\infty</math></li> <li>• use the factor theorem to factorise cubic polynomials in cases where a linear factor is easily obtained</li> <li>• solve cubic equations using technology, and algebraically in cases where a linear factor is easily obtained</li> <li>• recognise and determine features of the graphs <math>y=a(x-b)^4+c</math>, including shape and behaviour</li> <li>• solve equations involving combinations of the functions above, using technology where appropriate.</li> </ul> <p><b>Inverse proportions</b></p> <ul style="list-style-type: none"> <li>• examine examples of inverse proportion</li> <li>• recognise features of the graphs of <math>y=1/x</math> and <math>y=a/(x-b)</math>, including their hyperbolic shapes, their intercepts, their asymptotes and behaviour as <math>x \rightarrow \infty</math> and <math>x \rightarrow -\infty</math>.</li> </ul> <p><b>Graphs of relations</b></p> <ul style="list-style-type: none"> <li>• recognise and determine features of the graphs of <math>x^2+y^2=r^2</math> and <math>(x-a)^2+(y-b)^2=r^2</math>, including their circular shapes, centres and radii</li> <li>• recognise and determine features of the graph of <math>y=x</math>, including its parabolic shape and axis of symmetry.</li> </ul>		
<p>Unit 1 Weeks 9-11</p> <p>Term 1 Weeks 9-10</p> <p>Term 2 Week 1 11 hours</p>		<p><b>Counting and probability</b></p> <p><b>Language of events and sets</b></p> <ul style="list-style-type: none"> <li>• recall-concepts and language of outcomes, sample spaces and events as sets of outcomes</li> <li>• use set language and notation for events, including <math>\bar{A}</math> or <math>A'</math> for the complement of an event, <math>A \cap B</math> for the intersection of events A and B, and <math>A \cup B</math> for the union, and recognise mutually exclusive events</li> <li>• use everyday occurrences to illustrate set descriptions and representations of events, and set operations, including the use of Venn diagrams.</li> </ul> <p><b>Review of the fundamentals of probability</b></p> <ul style="list-style-type: none"> <li>• recall probability as a measure of 'the likelihood of occurrence' of an event</li> <li>• recall the probability scale: <math>0 \leq P(A) \leq 1</math> for each event <math>AA</math>, with <math>P(A)=0</math> if <math>A</math> is an impossibility and <math>P(A)=1</math> if <math>A</math> is a certainty</li> <li>• recall the rules <math>P(\bar{A})=1-P(A)</math> and <math>P(A \cup B)=P(A)+P(B)-P(A \cap B)</math></li> <li>• use relative frequencies obtained from data as point estimates of probabilities</li> </ul> <p><b>Conditional probability and independence</b></p> <ul style="list-style-type: none"> <li>• understand the notion of a conditional probability, and recognise and use language that indicates conditionality</li> <li>• use the notation <math>P(A B)</math> and the formula <math>P(A \cap B)=P(A B)P(B)</math> to solve problems</li> <li>• understand and use the notion of independence of an event <math>A</math> from an event <math>B</math>, as defined by <math>P(A B)=P(A)</math></li> <li>• establish and use the formula <math>P(A \cap B)=P(A)P(B)</math> for independent events <math>A</math> and <math>B</math></li> <li>• use relative frequencies obtained from data as point estimates of conditional probabilities and as indications of possible independence of events.</li> </ul>		

		<p><b>Binomial expansion</b></p> <ul style="list-style-type: none"> <li>understand the notion of a combination as an unordered set of <math>r</math> objects taken from a set of <math>n</math> distinct objects</li> <li>recognise and use the link between Pascal's triangle and the notation <math>\binom{n}{r}</math></li> <li>expand <math>(x+y)^n</math> for small positive integers <math>n</math>.</li> </ul>		
<p>Unit 1 Week 12</p> <p>Term 2 Week 2 1.5 hours</p>		<p><b>Exponential functions I</b> <b>Indices and the index laws</b></p> <ul style="list-style-type: none"> <li>recall indices (including negative and fractional indices) and the index laws</li> <li>convert radicals to and from fractional indices</li> <li>understand and use scientific notation.</li> </ul>		
<p>Unit 1 Weeks 12-13</p> <p>Term 2 Weeks 2-3 4 hours</p>		<p><b>Arithmetic and geometric sequences and series 2</b> <b>Geometric sequences</b></p> <ul style="list-style-type: none"> <li>recognise and use the recursive definition of a geometric sequence: <math>t_{n+1} = rt_n</math></li> <li>use the formula <math>t_n = r^{n-1}t_1</math> for the general term of a geometric sequence and recognise its exponential nature</li> <li>understand the limiting behaviour as <math>n \rightarrow \infty</math> of the terms <math>t_n</math> in a geometric sequence and its dependence on the value of the common ratio</li> <li>establish and use the formula <math>S_n = t_1 \frac{r^n - 1}{r - 1}</math> for the sum of the first <math>n</math> terms of a geometric sequence</li> <li>establish and use the formula <math>S_\infty = \frac{t_1}{1 - r}</math> for the sum to infinity of a geometric progression</li> <li>use geometric sequences in contexts involving geometric growth or decay, including compound interest and annuities.</li> </ul>
