

KIRWAN STATE HIGH SCHOOL: YEAR 12 VIM UNIT OVERVIEW

Term 2 Unit 6 Edit a digital image

Unit Description:

This unit will develop students' knowledge and skills associated with editing and manipulating an image captured digitally and preparing it for export in various formats and using RGB and CMYK colour modes.

Unit Objectives:

1. Use appropriate workplace health and safety office work practices
2. Identify and select appropriate digital media package
3. Use digital media package
4. Review digital media package
5. Assess digital image for characteristics and possible conversions
6. Edit digital image

Assessment Overview:

D2-1 Work log

Students use the learning episodes from this unit to adapt and enhance a collection of work samples. For each, they need to alter the image in an image Editing software title, then document what was done to achieve the requirements and why.

Conditions:

Open book
in-class task
limited support
reflects school assessment policy
aligned with school variation policy
Access to an Image Editing Software Title

A2-2 Assignment

Part A is theory questions. For part B, Students work for a simulated client and create a product for them based on client requirements given. The task requires a collection of images to be merged into a poster. Students then need to document what they did for each image.

Conditions:
